HELENA INDEPENDENT RECORD
HELENA, MONTANA

OCTOBER, 1967

Copper Strike Scars Montana's Economic Picture

Strike Effects Now More Pronounced—Prior to the start of the copper strike on July 15, 1967, the Montana economy was riding high, wide and handsome. Non-farm employment for the first five months of this year exceeded comparable months of all past years. All indicators pointed to a record breaking employment year. An employment peak of 200,000 non-farm wage earners was almost certain. Things started to change after July 15. The expected employment peak fell short by 4,300 workers. The heavy weight of the continuing copper strike is now laying hard on the economic scale with depressing pressures on both human and monetary factors. The work stoppage effects in the neighborhood of 7,500 workers directly involved in Anaconda, Butte, Great Falls, and East Helena. Secondary unemployment, especially at Butte and Anaconda, is becoming more noticeable. Other workers in trade, service, and other firms are on short work weeks. Many workers, fearful of a long strike, are leaving the strike areas to search employment both within and out-of-state.

Lost Wages Total Near \$15 Million—wages lost by the striking workers from the time the strike started on July 15 to November 1 is estimated to be at the \$15 million mark. The impact on the communities involved is clear. These are high velocity dollars which are lost forever. Under normal circumstances they would have been circulated immediately and directly into the main stream of the local economies for rent, food, clothing, utility bills, medical

care, and school supplies. They are the dollars that keep salespeople in stores, the service people in restaurants and laundries, the gas station attendants, the neighborhood grocer, and other tradespeople on their jobs. These are the people who are now facing unemployment because of the substantial reduction in consumer buying power caused by the strike.

500 Take West Coast Jobs—About 500 strike idled workers from Butte are now working in Washington, Oregon, and California. The majority of these are skilled craftsmen who have found employment in aircraft and shipbuilding industries. More skilled workers will be lost to other states as the strike continues. Montana cannot afford to lose these workers for one of a community's best assets is the presence of skilled workers in its population. They are capable of earning high wages. They are interested in good housing. They want good schools and public services and can afford to pay the taxes needed to have them.

39 Per Cent of Jobseekers in Three Places—The number of registered jobseekers at Anaconda, Butte, and Great Falls accounted for 39 per cent of the state total of 7,955 at the end of September. The statewide registered worker count was down 1,100 from August as students left the summer labor market to return to schools and colleges.

September Non-Farm Jobs Total 189,300—After a decline of 1,500 workers from August payrolls, non-farm employment in Montana's eight basic

industry groups was estimated at 189,300 for September. The total was down 2,600 from September a year ago. Job declines occurred over the month in six industry groups. Trade and service segments showed the biggest losses, down 700 and 900 respectively. This is a normal seasonal occurrence as tourist traffic fades, national parks and resort centers close for the season, and main street merchants adjust their work forces to more realistic levels after the busy summer season. Construction contractors trimmed 400 workers from their payrolls during September, mainly because of project completions. More moderate job declines from August to September occurred in manufacturing; transportation, utilities, and communications; and finance, insurance and real estate, all down 100 each. Statewide mining employment totals of 3,500 remained the same as August, but were down 3,800 from September last year because of the current copper strike. The only increase in employment during September was in government, up 800 from the August figure. The bulk of the increase was in educational units as the fall school term began.

Beets, Potatoes and Trees—The September farm front was an active one. The potato harvest was in progress while sugar beets and Christmas trees were close behind. Combined, these activities provide seasonal employment for approximately 4,000 workers. Some shortages of truck drivers, tractor operators, and all-around farm hands were in evidence throughout the month.

LABOR TURNOVER RATES IN MANUFACTURING AND MINING INDUSTRIES

(per 100 employees)

(Compiled in cooperation with U.S. Bureau of Labor Statistics)

Along the Hiring Line— Field Summary for September

ANACONDA, Deer Lodge, Philipsburg—Economic belt-tightening prevalent in community as strike caused idleness continues for several thousand smeltermen. Side effects of this dispute now cutting hard into other industry groups. Some workers already laid off and others on part time.

BILLINGS, Columbus, Hardin, Laurel, Red Lodge, Roundup—Employment levels have leveled off in most industries after good hiring trends earlier in the season. Construction volume shows little change from last month with only a few small projects added. Highway construction jobs over the 200 mark. Trade and service employment holds to steady trends with very little turnover. Good demand for truck drivers sparked by increased oil field activity near Broadus. Two sugar beet refineries will employ 1,000 workers in October.

BOZEMAN, Ennis, Three Forks, Trident—A good September economic picture presented by high level employment in all industries. Temporary shortages of laborers, carpenters, and truck drivers developed as pace of construction activity quickened. Shortages of loggers, and service and private household workers continues. Potato harvest took in 850 acres with good yields.

BUTTE, Virginia City, Whitehall—Copper industry strike goes into the fourth month with no appreciable progress noted toward early settlement. Negotiations between company and union officials seem to create new areas of disagreement at every meeting. Except for some new construction starts, job activity at low levels. Layoffs of supervisory personnel and clerical help continues at mining company offices.

CUT BANK—Construction highlighted September labor market scene with work on Two Medicine Dam, highway projects, and new homes in good progress. Trends were slower in oil field operations and lumbering and logging. Some upswing in latter should occur during October. Farm labor demand stayed fairly active.

DILLON—A continuing carpenter's strike about the only blemish on an active job front in industry and agriculture. Construction job totals at high levels on projects outside strike jurisdiction. Completion of new tungsten mill seen next 30-60 days; when operative in January, 1968 payroll of 100 men anticipated. Good farm labor demand

MONTANA CIVILIAN WORK FORCE

(In Thousands)

	Sept. 67	Aug. 67	Sept. 66	Aug. 67 to Sept. 67	Sept. 66 to Sept. 67

with no worker shortages.

GLASGOW, Fort Peck, Malta, Opheim—Community sweating out closure of air base in 1968. Efforts by community leaders and state and national officials for conversion of this facility to some civilian use so far unsuccessful. Out-migration of residents and workers continues. Construction and agriculture were most active industries.

GLENDALE, Circle, Wibaux—Outdoor hiring in construction, oil fields, and farms cut by heavy rains first half of month. Main street business trends appear fairly good after end of tourist season. Bridge, highway, and new hospital projects comprise main construction agenda. Farm labor supply adequate for late season activities including sugar beet harvest.

GREAT FALLS, Choteau, Fort Benton, Stanford—Trade industries paced job hiring during September with more than 200 workers added to payrolls of new shopping center. Construction keeps on even keel but with little new hiring noted. Farm labor demand, now at good pace, should continue active as long as good weather lasts. The debit side of the picture reflects lost incomes of strike idled smeltermen.

HAMILTON, Stevensville—Job hiring trends in construction and logging and lumbering at low ebb. Log inventories at local lumber mills below normal reducing demand for help. Main street business keeps at normal seasonal volume. Potato harvest delayed until October.

HAVRE, Chinook, Harlem—Good employment levels expected to continue in most industry groups until winter weather sets in. One exception is agriculture where most work has been completed for the season. Construction in good force with some new highway work in offing. Main street employment

in trade and service firms stays on steady basis.

HELENA, Boulder, Garrison, Townsend, White Sulphur Springs—Passive economic trends which covered area all season still prevail with little activity in any industry group. Large inventory of construction workers in waiting for jobs. Home building below normal and two highway projects totaling \$4 million employ but 52 men. Farm labor demand held fairly steady.

KALISPELL, Columbia Falls, Whitefish—Good labor demand for all occupations during September. Worker shortages existed in the lumber and food industries. Construction volume figured at \$56 million with new starts listed as addition to high school, two power substations, and 20 new homes. All area lumber mills operating at capacity. Forest service hiring active.

LEWISTOWN, Harlowton, Ryegate, Winnet—Job placements in trade industries down from last year but offset by increased hiring in forestry, mining, and manufacturing. Good agenda of building construction progressing in area but new starts consist mainly of small remodeling jobs. Farm job hiring up from year ago with some worker shortages.

LIBBY—Construction, lumbering, trade and service industries all exhibit healthy trends. Libby Dam employment shows slight decline with completion of some dam related projects. Some idled workers leaving for employment in other states. More workers went to jobs in logging, lumber mills, forest service projects, and trade firms making a job placement figure 58 per cent higher than last year.

LIVINGSTON, Big Timber—Tourist traffic was a good pace during September keeping employment high in trade and service firms. Worker shortages in-

* Preliminary Estimate—

Along the Hiring Line— Field Summary for September

cluded maids, cooks, waitresses. Heavy demand for workers in Yellowstone Park to replace students who left for school. Active trends in logging and lumber.

MILES CITY, Baker, Ekalaka, Broadus, Jordan, Terry—Overall economy of the area bolstered by good farm crops and presence of increased oil fields activity near Broadus. Main street business benefiting from these factors in contrast to year ago when crops were poor and little industrial activity was in evidence.

MISSOULA, Drummond, Arlee, Superior—Job hiring in most industries kept on the active side throughout the month. Increased activity in logging and mills followed end of fire danger in forests. Construction maintains good employment levels but new hiring at minimum. Trade and service industries benefiting from annual influx of university students.

POLSON—Workers from copper mining struck areas of Anaconda and Butte moved into area during the month searching for work. Good job trends now apparent in logging and lumber mills after slowdown earlier because of forest fire danger. Main street business active with some shortages of food industry workers at intervals.

SHELBY—Good weather allowed construction and oil field activities to make good progress during September. Replacement hiring continued in trade and service firms as students returned to school. Some workers leaving area with completion of work at missile sites. Farm job placements fell short of last month and same month last year.

SIDNEY—Area employment at high levels sparked by increased activity in construction and manufacturing. Major construction projects include school at Fairview and feed yard at Sidney. Worker shortages existed in virtually every occupation. Sugar beet campaign started September 27th with about 450 employed.

THOMPSON FALLS, Hot Springs—Logging and lumber mill operations making quick recovery from forest fire hazard slowdown earlier. Shortages of woods and mill workers expected during October. Normal seasonal trends cover other industry groups. No farm labor demand.

WOLF POINT, Plentywood, Scobey—Construction employment now at seasonal peak with all skilled workers on jobs. New projects included a church and municipal swimming pool. Oil drilling and exploration activities remain steady with average of 5 rigs on locations. Replacement hiring in trade and service firms in good force.

ESTIMATED EMPLOYMENT IN NON-AGRICULTURAL INDUSTRIES IN MONTANA (1)

(Compiled in co-operation with United States Bureau of Labor Statistics)
